About Me

Full-Stack Developer with strong backend expertise and a sharp eye for frontend development and **UI/UX design**. Built and operate a SaaS product with **10K+ users**, while maintaining an open-source repository with **500+ GitHub stars**. Experienced in building scalable systems and polished user experiences end to end.

Skills

Frontend: React, Next.js, TypeScript, Tailwind CSS, Vite

Backend: Node.js, Python, Express.js, REST APIs, GraphQL, OAuth, Worker Queues, Agentic AI

DevOps: Docker, DigitalOcean, Heroku, CI/CD

Apps & Tools: Git, GitHub, Figma, Rive, VS Code, Cursor, Codex

Experience

Xocket Labs, Design Engineer - Remote, India — Aug 2026 - present

- Design polished product visuals across dashboards, UI components, and landing pages, with strong visual presentation tailored for social media and product marketing.
- Create dashboard templates and reusable UI components for Watermelon Studio, an open-source UI library with **500+ GitHub stars**.
- Design mobile applications and landing pages for international clients, turning product requirements into clean, modern, and user-focused interfaces.

FameSpeak, Co-Founder - Remote, India — Mar 2026 - present

- Co-founding FameSpeak, a TTS platform with **10k+** users, and led most of the product's end-to-end development across frontend, backend, and infrastructure.
- Built and maintained a large backend system with user management, background worker queues, API workflows, and paid subscription functionality.
- Deployed and operated the platform across Heroku and DigitalOcean VPS infrastructure, including hosting TTS models on GPU servers and managing production services.

Souloxy, SDE Intern - Remote, India — May 2025 - Aug 2025

- Migrated a large legacy frontend from Create React App and plain CSS to Vite, React, and Tailwind CSS, modernizing the codebase and improving the development workflow.
- Built and maintained Express.js backend APIs, including organization authentication and a timezone-aware availability system for clients, therapists, and clinics.
- Implemented an agentic AI-powered mental health support system and contributed to production features now used by real users on Souloxy.

Projects

FameSpeak

Long-form text-to-speech platform that generates highly natural, human-like speech, used by **10K+ users**.

- Built scalable backend infrastructure with worker queues, subscriptions, and user management.
- Deployed and served TTS models on GPU infrastructure across Heroku and DigitalOcean.

Bun UI

A set of unique and animated React components you can install with one command starred by **20+** users.

- Built playful, interactive React components designed for easy reuse across modern web applications.
- Shared components on X, with one of them receiving like from the **CEO of Vercel**.

Education

Jadavpur University, B.E. - Kolkata, India — 2024 - 2028

- GPA: 7.5/10
