EDUCATION

Thadomal Shahani Engineering College, Bandra, B.E in Computer Engineering — Nov 2022 – Present

- CGPI: 9.27/10 (Upto Sem 6)
- **Coursework**: OOP, DSA, Operating System, Computer Networks, DBMS, Software Engineering, Cloud Computing.

SKILLS

Technical: : C, Java, Python, JavaScript, Node.js, Express.js, API Development, Next.js, Flask, MySQL, MongoDB, Firebase, Vercel, Netlify, GitHub Actions, HTML, CSS, React, AWS, GCP, Docker.

EXPERIENCES

Maha Mumbai Metro Operation Corporation LTD, Software Developer Intern — **Jan 2025 – Ongoing**

- Building **system architecture** for Administrative Billing Management. Integrated business logic with the back end. Streamlining the flow by reducing manual work by automating using **cron jobs** and business-level functions.

DigiNomisma, Software Developer Intern — **June 2025 – July 2025**

- Built a secure **P2P** communication app using Dart, with **native** integrations in Java, using platform channels for WiFi control and system-level features.
- Engineered end-to-end **SSL/TLS**-based security with custom certificate handling, encrypted storage, and QR-based credential exchange, while creating a HTTPS **server-client** architecture.
- Integrated Rust backend via **JNI**, used **NanoHTTPD** for HTTPS APIs and implemented real-time connection monitoring, hotspot management and role-based communication flow.

Developers Club of TSEC, Chairperson — **April 2024 – April 2025**

- Built **tsecdevsclub.com** and **TSEC APP** and scaled by **200+ MAU** with real-time updates and automated workflows.
- **Led 17 developers** via Agile to deliver modules, improve **SEO**, reduce Firebase costs, wrote **12 firebase functions for automation**. Optimised Image storage. Served **1200+** railway passes in 2024-25.
- Architectured **LLD** and launch railway concession feature, **reducing queues by 80%** and staff's manual effort by **90%.**
- Developed modules with **RBAC**s; optimized billing by **reducing db calls** and improved reliability with **unit testing**.

ACHIEVEMENTS

Awarded by principal for Working on TSEC App
Winner of TSEC Hacks, TSEC, Mumbai
Winner at Rubix, TSEC Mumbai
Winner at Hackoder 1.0, SAKEC, Mumbai
Consolation Prize in CodeSprint, St. Aloysius.
ML Track Winner at Hakanova 6.0 by TCET

PROJECTS

CertiNova | Bulk Certificate Generator and Validation Platform — **Code** | **Live**

- Engineered a B2B SaaS to generate **200+ certificates** in mins, reducing manual effort by **90%** with dynamic field mapping, CSV imports, and real-time previews.
- Secured sensitive recipient data using **AES-256-CBC + PBKDF2** ensuring zero plaintext storage and password protected certificate access, while maintaining a **RESTful API** for seamless scalability. Assigned **UUID** for each recipient
- Developed precision coordinate mapping with **±2px** accuracy. **Currently serving 500+ certificate generation.**

Grahak | CRM Simulator for Churn Prediction & Analysis — **Code**

- Achieved a AUC-ROC of **0.963** by developing and comparing an ensemble of ML models, including **Random Forest and Logistic Regression**, validated through rigorous train-test splits and **k-fold** cross-validation.
- Orchestrated customer churn analysis by implementing **K-Means clustering** for behavioral segmentation and **Apriori algorithm** for association rule mining to derive targeted retention strategies.
- Developed Graphs for analysis and decision making using **sklearn and seaborn**.

Yug Smriti | Interactive and Engaging Knowledge platform to Explain History — **Code**

- Leveraged **Mapbox** populating **GeoJson** data from the historical dataset for interactive maps and integrated LLM for country-based insight into rulers and civilizations.
- Added time travel themes, first-person narratives using **Voice RSS**, what-if scenarios, and **Wikipedia API** for the historical context summarization. Boosted engagement with **RPG** game, storytelling, and dynamic UI to fetch images from **Unsplash** for an immersive learning experience.
