SUMMARY

Full Stack Developer with 11+ years of web development experience, specializing in MEAN/MERN stack.

WORK EXPERIENCE

Module Lead | SDE-III
Edfora Infotech Pvt. Ltd., Delhi
September 2022 - Present
(Angular, React, Redux, Node.js, Express, MongoDB, Next.js, RxJS, TypeScript)

Senior Frontend Developer
EasyEat AI, Gurgaon
April 2021 - July 2022
(Angular 10+, TypeScript, React, Redux, RxJS)

Senior Frontend Developer
Shipmed Technologies Pvt. Ltd., Noida
July 2020 - April 2021
(Angular 10+, React, TypeScript)

UI Engineer
Unicommerce eSolutions Pvt. Ltd., Gurgaon
January 2019 - July 2020
(Angular 8+, TypeScript, Ionic Framework, HTML/SCSS, RxJS)

Software Engineer
UseKiwi Infolabs Pvt. Ltd., Delhi
May 2017 - July 2018
(AngularJS, jQuery, HTML/CSS, Gulp, Bower)

Software Engineer
BigFoot Retail Solutions Pvt. Ltd., Delhi
November 2016 - May 2017
(AngularJS, jQuery, HTML/CSS)

Web Developer
Hippo Innovations Pvt. Ltd., Gurgaon
September 2014 - November 2016
(AngularJS, jQuery, HTML/CSS)

SKILLS

Frontend Frameworks & Libraries
Angular, React, Next.js, Ionic

State Management & Architecture
Redux (Thunk, Toolkit), NgRx, RxJS, Context API

Styling & UI Frameworks
Tailwind CSS, Bootstrap, SCSS/CSS, Material UI

Core Technologies
JavaScript, TypeScript, HTML5, CSS3

Backend & API Development
Node.js, Express.js, NestJS, RESTful APIs

Database
MongoDB, Firebase

Build Tools & Others
Webpack, Git, npm, Responsive Design

Performance & Monitoring
Lighthouse, Chrome DevTools, Web Vitals, New Relic, Bundle Analyzer

EDUCATION

MS (Computer Science) **67**
Liverpool John Moores University, 2023

P.G. Diploma (Full Stack Development) **3.34**
International Institute of Information Technology, Bangalore (IIIT-B), 2021

B. Tech. (Information Technology) **65.88%**
Rajasthan Technical University, 2016

PROJECTS

Glorifire Platform Ecosystem (2022 - Present)

Glorifire is India's largest online learning and assessment platform where students evaluate themselves in real-test environments with powerful analytics-driven results. Complete ecosystem includes student platform (Glorifire), teacher platform (Stakeholders), admin dashboard (Watson), content management system (Authors), and supporting applications built with Angular and React.

- Owned end-to-end delivery of multiple production applications spanning Angular and React ecosystems.
- Architected and maintained Glorifire, Glorifire Stakeholder, and Watson applications using Angular/NgRx; architected React applications with hooks and Redux Toolkit.
- Engineered full-stack features in a MEAN/MERN environment, owning React/Angular frontends while shaping Node.js/Express API contracts and MongoDB schema design.
- Achieved 60% performance improvement through code optimization, lazy loading, and bundle size reduction.
- Built and led a 17-member engineering team from the ground up, owning hiring, mentoring, architectural decisions, code reviews, sprint ceremonies, and enforcing coding and UI standards across the platform.

EasyEat AI Platform Suite (2021 - 2022)

EasyEat AI is a contactless solution that digitises and enhances customer interaction in restaurants.

- Worked upon 3 production applications: Partner App (Angular PWA), Shannon (Angular application for staff management), and customer ordering app (React).
- Architected comprehensive offline-first PWA, caching HTML/CSS/JS/image resources with IndexedDB for client-side storage, enabling restaurants to process orders without internet connectivity.
- Built real-time interactive table layout module with drag-and-drop functionality, allowing restaurant managers to design floor plans, track table occupancy, customer orders, payment statuses, and live revenue across multiple floors with instant notifications for customer requests, payments, and order placements.
- Implemented network-first caching strategy with Service Workers, achieving sub-millisecond application load times.
- Developed offline payment calculation engine, handling complex pricing logic, taxes, discounts, and split bills entirely on the frontend without backend dependency.
- Reduced bundle size by 50%+ through code splitting, lazy loading, and build optimization.
- Built complex PoCs including offline order management and real-time synchronization.

1tab.com (2020 - 2021)

1Tab connects individuals to pharmacies and medical consultants, delivering medicines at their doorstep and scheduling medical examinations in advance, saving their time and energy.

- Developed B2C e-commerce platform and admin panel for order management using Angular.
- Implemented Server-Side Rendering (SSR) with Angular Universal for SEO optimization and improved initial load performance.
- Built responsive, lazy-loaded modules for customer-facing and admin application.
- Independently managed end-to-end ownership of 2 products (customer platform + admin panel).

Uniware 2.0 (2019 - 2020)

Multi-channel order fulfillment software for e-commerce merchants with hybrid mobile/web platform.

- Migrated legacy web application to hybrid cross-platform solution using Ionic framework.
- Developed complete modules from scratch including UI/UX implementation with HTML/SCSS and business logic with Angular/TypeScript.
- Built responsive, mobile-first components compatible across iOS, Android, and web platforms.
- Implemented lazy loading and code splitting for optimal performance on mobile devices.
- Built reusable design system with standardized components and shared styles across the platform.

AffordPlan Healthcare Platform (2017 - 2018)

Healthcare payment platform enabling flexible hospital payment plans. Patient-facing website and internal product suite with multiple modules.

- Developed patient-facing website (SPA) and internal product suite with multiple independent application modules.
- Architected custom Gulp build pipeline from scratch, implementing asset minification, concatenation, and hash-based cache busting (pre-dating modern framework tooling).
- Optimized application performance, reducing load time by 66% through build optimization, lazy loading and code improvements.
- Implemented SEO-friendly SPA architecture with responsive design and cross-browser compatibility.

ShipRocket App (2016 - 2017)

ShipRocket is a logistics software that offers automated shipping solution to the sellers, allowing them to ship their products anywhere on the globe.

- Developed and maintained logistics application features for automated shipping workflows.
- Implemented cross-browser compatible interfaces for seller dashboard.
- Contributed to platform enabling global e-commerce shipment automation.
