Education

VIT-AP University 2023 - 2027
B.Tech in Computer Science and Engineering - CGPA: 8.46/10 *Amaravati, Andhra Pradesh*

Technical Skills

Languages: Python, JavaScript (ES6+), Java, SQL, HTML/CSS, C/C++
Frameworks & Libraries: React, Node.js, Express.js, Next.js, FastAPI, Flask, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis
Cloud & DevOps: Microsoft Azure, Docker, Git, GitHub Actions, CI/CD, Linux
CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management System (DBMS), Computer Networks (CN)

Experience

Software Developer Intern – Ignict Tech Private Limited *Apr 2026 – Jun 2026, Vellore, TN (Hybrid)*

- Developed 8+ features and resolved 20+ bugs across the application stack using React, Fastify, Python, and PostgreSQL.
- Deployed applications on Microsoft Azure, automated CI/CD workflows, and performed functional and regression testing across 20+ scenarios.

Full-Stack Developer Intern – Feedine Foodworks Private Limited *Jan 2025 – Jun 2025, Chennai, TN (Remote)*

- Maintained and deployed a PHP–Laravel–Vue.js application with MySQL on cloud infrastructure, supporting application development and reliability.
- Tested a Flutter application across 30+ scenarios, documented 20+ issues, and contributed to debugging and resolution.

Projects

Support-Pilot – AI-Powered Customer Support Platform | *FastAPI, Gemini 2.5 Flash, Pinecone, SQLAlchemy*
- Built an AI-powered customer support platform processing 50+ tickets with automated classification, RAG-based response generation, and human-in-the-loop review using FastAPI and Pinecone. [GitHub]

SiteIngest – Website Hosting & Monetization Platform | *React, Flask, PocketBase, Bootstrap*
- Built a full-stack SaaS platform supporting 50+ website deployments with subdomains, automated ad injection, impression analytics, authentication, and ZIP-based deployment using a Flask microservice architecture. [GitHub]

AWFEX – Open-Source Workflow Automation Engine | *React, Node.js, Express.js, SQLite*
- Developed an open-source visual workflow automation engine supporting 20 node types, custom function orchestration, HTTP triggers, and extensible automation pipelines through a node-based interface. [GitHub]

GestureCall – AI-Powered Video Call Intercom for Inclusive Communication | *Python, MediaPipe, Raspberry Pi 4, OpenCV*
- Developed a Raspberry Pi 4 video intercom supporting 24 sign gestures, speech-to-text, and vibration-based call alerts for deaf and hearing users over a local network at VIT-AP University. [GitHub]

Web Embedded Python (WEP) – A Micro Framework | *Python, Flask*
- Created a lightweight Python micro-framework with a custom template engine supporting embedded Python in HTML, simplifying server-side rendering and reducing boilerplate for rapid application development. [GitHub]

Certifications & Achievements

- **Certifications**: **IBM** – GenAI using Watsonx | **HackerRank** – Python, Java, React, REST API
- **Achievements**: 9th Place – Great India Hackfest 2024, CSI VIT-AP [Cert] | Java Host – 100 Days of Coding (taught to 600+ students) [Cert]
