Experience

EVENTdata Athens, GR
Software Engineer *Feb. 2025 – Sept. 2026*

- Developed and maintained full-stack commercial web applications for promotional campaigns involving Samsung, DeLonghi, VELO, Johnnie Walker, and Enerwave at the Thessaloniki International Fair (ΔΕΘ).
- Integrated speech-to-text functionality into an existing cross-platform iOS and Android application using .NET MAUI, C#, and XML, improving accessibility and usability.

Selected Projects

ICE E-Shop | *Java, Spring Boot, MySQL, Hibernate, Docker, JWT, React*

- Developed a containerized e-commerce backend using Spring Boot, exposing RESTful APIs for product, user, and order management.
- Implemented JWT authentication, Hibernate ORM, request validation, and API documentation with Swagger UI.
- Integrated the backend with a React frontend and containerized the application stack using Docker. GitHub

DiveScore | *Kotlin, Jetpack Compose, Retrofit, Java, Spring Boot, Docker, AWS, Azure, Cloudflare*

- Developed a native Android application for recording, managing, and analyzing scuba diving metrics using Kotlin and Jetpack Compose.
- Built a Spring Boot REST API with layered architecture, Retrofit communication, and caching to reduce redundant API requests.
- Containerized and deployed the backend across AWS and Microsoft Azure VMs, using Cloudflare and Nginx.

Hackathons & Awards

LifeHack Athens 2026 Athens, GR
Pfizer Track - 1st Place & Microsoft for Startups Technology Prize *June 2026*

- Developed MetNav, an AI platform for precision medicine targeting metabolic diseases, collaborating in a 5-person team during a 36-hour hackathon.
- Implemented AI and backend components using Python, FastAPI, TypeScript, LangGraph, and PyTorch. GitHub

ACE AI Hackathon Athens, GR
AI Software Hackathon *March 2026*

- Developed a Vision-to-RAG Prompt Builder for energy billing analysis, combining OCR, RAG and Azure AI Search to optimize data retrieval and processing efficiency for DEI/PPC.
- Built a full stack AI Powered web application using Python, LangChain, Streamlit, Tesseract OCR, Azure AI Search, and FastAPI. GitHub

Oπen Hackathon for Accessibility 2026 Athens, GR
Software Hackathon *Sept 2026*

- Developed VibraCoach, combining a Kotlin Android app with an ESP32 wearable vibration device for real-time communication with deaf athletes. Website | GitHub

Education

University of West Attica Athens, GR
Integrated Master's in Informatics and Computer Engineering *Oct. 2022 – Oct. 2027*

Technical Skills

Languages: Java, Kotlin, C#, Python, C/C++, SQL
Backend: Spring Boot, Microservices, Hibernate ORM, REST APIs, JWT, Swagger, Maven, ASP.NET Web Forms
Mobile: Android, Jetpack Compose, Retrofit, .NET MAUI
Cloud & DevOps: Docker, Docker Compose, Git, GitHub, Microsoft Azure, AWS
AI: RAG, Large Language Models, AI-Integrated Solutions
Spoken Languages: Greek (Native), English (Professional Working Proficiency), Spanish (Elementary)
