Education

Indian Institute Of Information Technology, Jabalpur — Jabalpur, India
Bachelor of Technology in Computer Science and Engineering — *August 2023 – May 2027*

Experience

NeuralPort Inc — Remote (Japan)
Full Stack Engineer Intern — *January 2026 – Present*

- Architected analytics dashboards for **ZEN EYE Pro**, a VR + eye-tracking cognitive fatigue platform serving **200+ users** across **15+ devices** with **1,800+ recorded sessions**
- Engineered fatigue-metric visualizations in **Vue.js/TypeScript**, reducing coaches' data review time by ∼40% with on-the-fly assessment comparisons across athlete cohorts
- Developed 5+ REST APIs using **Play Framework (Scala)** and **PostgreSQL** to ingest high-frequency eye-tracking data, processing 10K+ data points per session and **cutting query downtime by 50%**
- Drove system reliability improvements across frontend-backend data pipelines with VR engineers and data scientists, eliminating data-loss incidents during live trials

Technical Skills

Programming Languages: Python, Java, C++, C, JavaScript, TypeScript, Scala, PHP, SQL, Bash
Testing and QA: Manual Testing, API Testing, Unit Testing, System Testing, Performance Testing, White Box Testing
Frameworks: React.js, Next.js, Vue.js, Node.js, Express.js, Django, Flask, Play Framework, Redux
Databases: MySQL, MongoDB, SQLite, Supabase, PostgreSQL, Query Optimization

Certifications and Cloud Expertise

Google Cloud Skills Boost Specialist — Public Profile
57 skill badges, 74,000+ XP – Cloud Architecture, Data Engineering, ML, Security — *April 2025 – June 2025*

NVIDIA Deep Learning Institute (DLI) — Certificate
Building LLM Applications with Prompt Engineering – Certificate of Completion — *May 2025 – June 2025*

Key Projects

PawGle – Pet Recognition Platform | *React.js, Next.js, Django, Azure, Cloudflare, Supabase, PostgreSQL, Docker, Resend* — GitHub

- Engineered and deployed a scalable pet image recognition platform using Azure backend and Cloudflare CDN, serving 100+ users with CI-tested pipeline handling 10+ daily uploads and zero false-match incidents
- Implemented ArcFace-based facial recognition model achieving 87%+ accuracy across 500+ test samples with automated unit and regression testing
- Optimized API response time by 25% through PostgreSQL query refactoring and indexing via Supabase, sustaining 2,000+ monthly requests under peak load
- Integrated Resend-powered custom email service for authentication, verification, and real-time notifications, improving system reliability and user engagement

NeoCast – Video Platform | *Next.js, TypeScript, Bunny.net, Xata, Drizzle ORM, Arcjet* — GitHub

- Designed full-stack screen recording and video-sharing platform supporting 100+ concurrent users with end-to-end functional testing
- Integrated AI-powered transcript generation across 500+ videos, boosting keyword searchability by 40%
- Implemented token-based auth validated across 500+ sessions and Arcjet bot protection stress-tested to sustain 60 req/min with 100% uptime

Competitive Programming

- **Codeforces:** Specialist (1400+) | **CodeChef:** 4-star (1800+) | **Leetcode:** Knight (1900+) – Codeforces | CodeChef | LeetCode
- Solved 500+ algorithmic challenges in data structures, graphs, and DP, sharpening edge case identification and debugging skills

Achievements

- **Open Source:** Merged PR #2677 into the Appwrite Console repository; active contributor with bug fixes and code improvements across multiple OSS projects.
- **Hackathons:** Delivered full-stack prototypes under 24-hour constraints, demonstrating rapid system design and agile execution.
