Summary

Software Engineer with 4+ years of experience in production environments. Proficient in React, Next.js, Node.js, and cloud-based platforms, with a strong track record of optimizing performance and designing efficient and maintainable systems. Experienced in Full-Stack development, database optimization and AI tools for ongoing support. Passionate about building simple and reliable solutions that solve real-world problems.

Technical Skills

Languages: JavaScript, TypeScript, Python, PHP

Frontend: React, React Native, Vite, Next.js, Redux, Zustand, Context API, Material UI, TailwindCSS, Bootstrap, GSAP, Framer Motion, jQuery, HTML, CSS

Backend: Node.js, FastAPI, Express.js, Redis, Socket.IO, JWT, Oauth 2.0, Prisma ORM

Databases: MySQL, MariaDB, SQLite, Firestore

Cloud & DevOps: AWS, Cloudflare, Railway, Squarespace, Google Workspace, GitHub Pages, GitLab, Docker

Tools: Git, GitHub, Jest, Supertest, ESLint, Prettier, Biome.js, Expo, npm, pnpm, yarn, Markdown, Miro, Figma, Copilot, Claude

Professional Experience

High Specialty Medical Center — **Xalapa, Ver**

Software Engineer — **Apr 2023 — Present**

- Developed and maintained microservices architecture across multiple departments, improving the main administrative clinical integral system modularity and scalability.
- Performed unit, integration and e2e tests over system modules and microservices improving quality and reliability of delivered code.
- Developed and deployed a scalable web platform supporting 8,000+ users for an annual medical congress event, achieving high availability using React, Firebase, MySQL, Github Pages, Squarespace and AWS services.
- Built backend services with Node.js and integrated RESTful APIs, improving data processing efficiency and reducing response times by up to 40%.
- Designed and implemented QR-based attendance tracking systems using Python, enabling automated validation and reducing manual processes by up to 80%.
- Automated generation and distribution of attendance certificates using Python and Canvas, reducing manual processing time significantly.
- Optimized database queries and workflows, enhancing reporting performance and reducing execution time significantly.
- Led database restructuring and migration efforts through ETL processes, improving system performance and enabling future feature scalability.

Electronic Government Subdirectorate — **Xalapa, Ver**

Software Engineer (Contract) — **Nov 2025 — Jan 2026**

- Developed a cross-platform mobile application “Xalapa Movil” using React Native and Expo, delivering consistent experience on Android and iOS.

- Built and optimized multiple application screens with efficient state management, improving performance and user experience.
- Integrated backend services via RESTful APIs, ensuring seamless data communication and system reliability.
- Identified and resolved critical issues, reducing application errors and improving overall stability.
- Collaborated with multidisciplinary teams, contributing to project delivery from initial design to deployment.
- Provided mentorship and technical guidance to junior developers, promoting best coding practices and code quality.

National Laboratory of Advanced Informatics — **Xalapa, Ver**
Cloud Engineer — **Feb 2022 — Dec 2022**

- Deployed academic applications in cloud platforms (AWS, Azure, Heroku).
- Analyzed and refactored code of applications built on different frameworks.
- Managed and implemented JBoss (WildFly) server for hosting Java applications on AWS.
- Tested and debugged application code using SonarQube, improving code quality and maintainability.

Education

Veracruzana University — **Xalapa, Ver**
Bachelor's Degree, Computer Science — **Aug 2018 — Dec 2023**

Courses and Certificates

Oracle
Oracle Next Education — **Dec 2022 – May 2023**

Microsoft
AZ-900 — **July 2022**

Microsoft
Microsoft Hackathon (Hack the Ocean) — **May 2022**

Microsoft
Microsoft LaunchX: Developer Training — **Mar 2022 – May 2022**

Cisco
CCNA: Routing & Switching — **Dec 2019**

Languages

Spanish — Native **English — Advanced**
