About

I'm a Fullstack Engineer with a strong focus on problem-solving and building efficient, user-centered applications. I enjoy turning ideas into reliable, scalable software while maintaining clean, maintainable code and thoughtful design. With a growing skill set across both front-end and system-level thinking, I aim to create solutions that are not only functional, but also intuitive and impactful.

Projects

Portfolio | *ReactJS 19, TailwindCSS v4, Neu-brutalism Design Style* **April 2026**
Github: https://github.com/PhatJack/portfolio-04-2026
Website: https://willam2003.site/

MedicHIMS | *NestJS, Prisma, CoreUI, SCSS, PostgreSQL, ReactJS 18* **March 2025 - Present**
Role: Full-stack Developer
Member: 6

- Developed and refactored UI components to improve usability.
- Integrated APIs into modules: healthcare service, medicine
- Maintained and optimized existing features by debugging, refactoring, and improving performance.
- Built reusable UI components, custom hooks, and utility functions to minimize code duplication and improve maintainability.
- Developed the Healthcare Management modules following the HL7 FHIR standard, supporting full CRUD operations.

MedicPHR | *React-native, Redux, Supabase, GraphQL, NestJS* **March 2025 - Present**
Role: Full-stack Developer
Member: 6

- Optimized user flows to reduce friction, improve usability, and increase overall customer satisfaction.
- Integrated APIs into modules: pills, questionnaire, conditions,
- Contributed to UI reviews and adjustments to enhance visual consistency and usability.
- Developed slices, reducers, and actions to handle complex business logic.

Onemedic.vn | *NextJS 14, GraphQL, Strapi CMS, ReactJS 18, Apollo Client, TailwindCSS v3* **March 2025 - Present**
Role: Front-end Developer
Website: onemedic.com/vi
Member: 1

- Integrated Apollo Client with Next.js for efficient data fetching and state management.
- Optimized loading performance using caching, improving page load speed by 40%.
- Developed and configured APIs in Strapi to handle form data from the UI.
- Built reusable components to ensure consistency and maintainability across the application.
- Created documentation and step-by-step workflows to enable non-technical users to manage content independently.

Tu Tien Game | *ReactJS 18, TailwindCSS v3, Python, Django, Websocket* **July 2024 - September 2025**
Role: Front-end Developer
Website: https://tutien.pro/

- Developed and implemented interactive user interfaces for a cultivation game, enhancing user experience.
- Optimized application performance by implementing code-splitting and lazy loading, reducing initial load times and improving user experience.
- Implemented real-time communication using WebSocket to enable interactive boss battles between users in a multiplayer game.

Experience

Front-end developer **July 2024 – July 2025**
Freelancer *Ho Chi Minh City*

One Medic JSC **March 2025 – August 2026**
Full-stack developer *Ho Chi Minh City*

- Developed UI from Figma designs using React and CoreUI.
- Fetched and synchronized data in the frontend using React Query.
- Performed client-side CRUD operations by interacting with PostgreSQL-backed APIs.
- Collaborated in developing core product features and improving performance.
- Debugged and resolved software defects to improve application stability and user experience.
- Improved and refined UI components based on design updates and user feedback.

Lagtuz Media **August 2024 – February 2025**
Front-end developer *Ho Chi Minh City*

- Participating in discussions with Designer to improve user experience.
- Implemented enhancements that improve web functionality and responsiveness.
- Developing and maintaining for the front-end functionality of websites.

Skills

Languages: JavaScript (ES6+), TypeScript, SQL

Frameworks/Libraries: React, Next.js, React Native, Node.js, NestJS, Tailwind CSS v3/v4, SASS

Web animations: GSAP, Motion (Framer motion), WebGL

State Management/UI: Redux, Zustand, Ant Design, Material UI, CoreUI, Bootstrap 5, Shadcn/ui

Backend/Database: Prisma, PostgreSQL, RESTful APIs, GraphQL

Cloud & Tools: Microsoft Azure, Git, Figma, Framer, Postman

Domain Knowledge: Healthcare Systems, HL7 FHIR Standards

Languages: English, Vietnamese

Certificates

TOEIC 915 (Listening and Reading) **April 2025**
IIG Vietnam

Education

Sai Gon University **September 2021 – March 2026**
Major: Information Technology (GPA: 3.53) *Ho Chi Minh City*

Achievements

University Scholarship **2022 - 2025**
