Professional Summary

Innovative Solution Architect and Principal Software Engineer with over 10 years of experience designing scalable software architectures for healthcare, life sciences, and financial services. Skilled in Python, FastAPI, Flask, Django, and cloud platforms (Azure, AWS, Google Cloud). Proven expertise in AI/ML solutions, full-stack development, and leading cross-functional teams to deliver impactful projects.

Core Competencies

- **Languages**: Python, JavaScript, TypeScript, HTML5, CSS
- **Frameworks**: FastAPI, Flask, Django, Next.js, ReactJS
- **Cloud Technologies**: Azure Data Platform, AWS, Google Cloud
- **AI/ML**: TensorFlow, PyTorch, Scikit-learn, NLP
- **Data Tools**: Pandas, NumPy, SQL, Scrapy, Celery
- **DevOps**: Git, Docker, Agile, Scrum, Jira, Confluence
- **Specialties**: Software Architecture, Full-Stack Development, Data Mining, Web Scraping, Cloud Computing

---

Professional Experience

Solution Architect - Python | Intech Online
Feb 2024 - Sep 2024

- Architected PMS, VMS, and ZE applications for VodafoneIdea using Python and cloud technologies.
- Collaborated with stakeholders to deliver scalable, high-performance solutions.

Technical Lead - Python | Blazecian Technologies
Oct 2023 - Feb 2024

- Led a team of 5 to develop FastAPI-based backend solutions for FWD Insurance (Thailand).
- Managed cloud migration projects, improving performance and reducing costs.

Technical Lead - Python | Merit Data & Technology India
Dec 2022 - Aug 2023

- Directed web scraping and data mining projects using Python, Scrapy, and SQL.
- Led a team of 6 to deliver client-focused, high-quality solutions.

Associate Team Lead - Python | NeoSOFT
Nov 2021 - Dec 2022

- Managed 8 developers to build microservices APIs with Flask/Django for clients like Deloitte.
- Developed system monitoring and survey tools to enhance compliance.

Software Engineer - Python | NeoSOFT
Jun 2021 - Nov 2021

- Built data analytics and sentiment analysis solutions using machine learning models.

Lead Python Developer | Research & Analytics Solutions
Mar 2018 - Jun 2021

- Led data mining and web scraping initiatives, integrating ML for enhanced accuracy.
- Oversaw operations, hiring, and technical strategy development.

Full Stack Developer (Self-Employed) | EverythingRAS
Feb 2015 - Mar 2018

- Developed responsive web applications and data extraction tools using ReactJS and Python.

Education

Bachelor of Computer Applications (BCA)
Amrita Vishwa Vidyapeetham | Jun 2021 - Oct 2024

Higher Secondary Certificate (HSC)
Ganadhish School & College, Rajapur | Mar 2020 - Jun 2021

Certifications

- Machine Learning & Deep Learning in Python & R (Udemy)
- Python for Data Science & Machine Learning (Udemy)
- Google Cloud Computing Foundations

Projects

- **Loan Management Web App**: Built with ReactJS, Tailwind, and Firebase.
- **AI Assignment Maker**: AI-driven tool for academic content generation with PDF export.
- **Data Mining Solutions**: Large-scale web scraping with Python and Scrapy.

Technical Skills

- **Programming**: Python, JavaScript, TypeScript
- **Web**: ReactJS, Flask, Django, HTML5, CSS
- **Cloud**: AWS, Azure, Google Cloud
- **AI/ML**: TensorFlow, PyTorch, Scikit-learn
- **Tools**: Pandas, NumPy, SQL, Scrapy, Docker
